

Advanced Multilayer Plastic Piping Systems

EN

2026

 **KOUVIDIS**
The image shows two workers in red shirts and dark pants installing white flexible conduits in a concrete room. One worker is on a ladder, and the other is on the ground. Bundles of conduits are leaning against the wall, and some are lying on the floor. The text 'KOUVIDIS' is overlaid in the top left corner.

**Committed
to keep you
in the lead**

Cable protection

Our piping systems comply with the highest safety standards...

... and incorporate advanced innovations

Drainage systems

discover
our 47 years
know how...

WE ARE A PASSIONATE, SECOND-GENERATION, FAMILY-OWNED ENTERPRISE, THE LARGEST PLASTIC PIPE MANUFACTURER IN GREECE, SPECIALIZED IN THE DEVELOPMENT AND PRODUCTION OF INNOVATIVE MULTILAYER PLASTIC PIPING SYSTEMS FOR CABLE MANAGEMENT AND DRAINAGE.

Our business philosophy is to ensure:

safety to the installers

confidence to the engineers

trust to our partners and

respect to our employees and our society

In this regard we are constantly seeking for new innovations, exploring modern plastics, and manufacturing the best sustainable solutions for our customers.

TECHNOLOGIES EXPLANATION

Halogen free conduits acc. to EN 50642
Low smoke density of conduits burning acc. to EN 61034-2
Low acidity of gas content during combustion acc. to EN 60754-2
Antimicrobial protection on plastics acc. to ISO 22196
UV stability after testing in real and artificial (acc. to EN ISO 4892-2) weathering conditions
Anti-electromagnetic technology which absorbs part of the electromagnetic radiation emitted by the cables
Low friction in the internal layer of the conduit acc. to IEC/TR 62470
Anti-rodent technology which repels rodents (European Patent EP2698792)
Color marking with longitudinal stripes, of indelible color, according to NF P 98-332 Standard. Red and green lines indicate power and telecommunication cables respectively, whereas blue lines distinguish the water running in the pipe.

SPECIFICATIONS EXPLANATION

CLASSIFICATION for cable protection conduit systems is according to EN 61386.01 and EN 50626-1 (replaces 61386-24) and for drainage piping systems is according to EN ISO 9969
Materials are specially stabilized heavy metals free (RoHS) thermoplastics
Compression strength for cable protection conduit systems refers to resistance to compression (EN 61386.01) and for drainage piping systems refers to ring stiffness (EN ISO 9969) and ring flexibility (EN ISO 13968 for GEOSAN pipes)
Impact strength for cable protection conduit systems refers to resistance to impact (EN 61386.01) and for GEOSAN pipes refers to impact strength (EN 744)
Ingress protection for cable protection conduit systems refers to protection against solid objects and water (EN 60529) and for GEOSAN pipes refers to permanent leak tightness (EN 1277)
Diameters refer to pipe's outside diameters
*IP68 when the pipe is bonded to its coupler with the use of KOUVIDIS sealant

ADDITIONAL INFORMATION

All products are manufactured from special stabilized thermoplastic materials, heavy metals free acc. to RoHS (2011/65/E, 2015/863/EU) and Reach (EC /1907/2006 European Directives). All conduit systems for cable protection comply with the essential safety requirements of the EC Low Voltage European Directive 2014/35/EU.
KOUVIDIS is committed to sustainable development through the implementation of three MS acc. to ISO 9001, ISO 14001 and ISO 45001, the reduction of its emitted pollutants and waste packaging, the rational use of water and energy (RES) and the use of high quality materials with the lowest environmental footprint.
Contact our Technical Support department to learn more details about our products (+30 2810 831 500).

○ Recommended - Not recommended • Best choice acc. to the manufacturer

The above Installation fields are only recommendations due to the technical specifications of KOUVIDIS products. National or local restrictions and prohibitions must always be considered.

★ The above-mentioned light type conduit system is also available in yellow color RAL 1023 with longitudinal lines in red and green color to distinguish power and telecommunication cables respectively with the brand name SUPERSOL PLUS - SUPERFLEX PLUS.

OUR HEADQUARTERS Heraklion, Crete

With 47 years of successful presence, KOUVIDIS is one of the top manufacturers of multilayer plastic piping systems for cable protection, sewage, and drainage in Europe.

The trust that we have cultivated with our customers through all these years are the main source of inspiration for the development of new products and innovative solutions that secure high quality and safety to the installer.

We are delighted to have fulfilled a multi annual investment plan for the construction of our new Smart Factory and the installation of our state-of-the-art production lines adopting the values of the 4th industrial revolution. Thus, we now look into the future with confidence and we commit to keep creating value for our staff, our customers, and our partners, whilst to contribute to the development of our society.
